## MEMBRANES AND TAPES

Dimensions ranging from 4" to 36" wide x 75' to meet the needs of roofing and building envelope industries.

### ON ROOFS

*Ideal for parapets  
Easy application on deck*

### ON WALLS

*4" - panel joints  
6" and 9" - around windows  
12" and 18" - wall / roof junction  
36" - panel covering*

«Peel and stick»  
membrane

#### Self-sealing

Self-seals perfectly around screw and nail penetrations.

#### Air and vapour barrier

Surpasses the industry's most rigorous air and vapour resistance tests.

#### Tear and puncture resistant

High density film used in membrane manufacturing provides excellent resistance to accidental cuts and tears.

#### No primer required

Super tacky adhesive formulation sticks well to virtually any surface.

#### Lightweight

Easier to handle during installation and handling.

#### Semi translucent

Easier to identify details behind the membrane.
