

LEGEND

-  Perimeter Area
-  Corner Area

ROOF HEIGHT DIFFERENTIAL
GREATER THAN 3' (90 cm)

ROOF HEIGHT DIFFERENTIAL LESS
THAN 3' (90 cm)

Note: Where mutli-level roofs meet at a common wall, the adjacent edge of the upper roof is treated as a perimeter requiring enhanced fastening only if the difference in height is greater than 3 feet (90 cm). Neither Lexcan nor FM requires fastening enhancement at the lower roof area adjacent to the higher building wall, regardless of height differential.
